

Higher Power and Higher Performance at a Lower Price

These new high frequency components each offer top cost-to-performance ratios, and excellent quality workmanship.

2 Watt 40 GHz Attenuators

These new 2.92mm 40 GHz attenuators provide four times the power handling of our previous offering. They are ideal for test and measurement and the OEM markets, offering price alternatives to other "scientific grade" products available.

DC Blocking SMPM Terminations

The DC Blocking SMPM terminations, operate from 30 kHz to 50 and mate with GPPO™ and SMPM male connectors. They are ideal for 40 Gb/s optical transmission systems and for test and measurement applications.
