Aeroflex Announces Expansion of XTS-5000 Auto-Test II Option to Include Other Motorola Models

<http://www.aeroflex.com/ats/products/prodfiles/news/03172009.pdf>

LAS VEGAS—International Wireless Communications Expo (IWCE 2009)—March 16 – 20, 2009—Aeroflex has announced the expansion of the XTS-5000 Auto-Test II Automated Test and Alignment Option for the 3920 Digital Radio Test Set. This option provides automated test and alignment of Motorola XTS and XTL Series Radios. The latest version includes support for additional Motorola portables such as the XTS-1500, XTS-2500, XTS-4000, SSE-5000 and MT-1500. It also includes support for the XTL-1500, XTL-2500 and XTL-5000 mobiles.

The Auto-Test II Option is a breakthrough in radio test technology. When enabled with this feature, the 3920 automatically controls the radio and determines if the radio is performing within specified parameters. The engineer no longer requires a computer to control the radio's software, since the 3920 takes over the role of radio controller. Test repeatability and results are dramatically improved, and test times are reduced.

Since the system automatically controls the radio, no interaction is required to test and align the radios, allowing for non-technical individuals to tune and confirm radio operational parameters.

Availability

The XTS-5000 Auto-Test II Option is available as 390XOPT600. Users will need to purchase the Auto-Test II Option, 390XOPT059 before purchasing the XTS-5000 Auto-Test II Option, 390XOPT600. 390XOPT600 is available immediately. The Aeroflex 3920 has a delivery time of 8-10 weeks upon receipt of order. For more information, contact your local Aeroflex sales office by visiting www.aeroflex.com or calling Aeroflex Sales at (800) 835-2352.

About Aeroflex

Aeroflex Incorporated is a global provider of high technology solutions to the aerospace, defense, cellular and broadband communications markets. The Company's diverse technologies allow it to design, develop, manufacture and market a broad range of test, measurement and microelectronic products. Aeroflex Incorporated was founded in 1937 and today has more than 2600 employees worldwide. Additional information concerning Aeroflex Incorporated can be found on the Company's Web site: www.aeroflex.com.

All statements other than statements of historical fact included in this press release regarding Aeroflex's business strategy and plans and objectives of its management for future operations are forward-looking statements. When used in this press release, words such as "anticipate," "believe," "estimate," "expect," "intend" and similar expressions, as they relate to Aeroflex or its management, identify forward-looking statements. Such forward-looking statements are based on the current beliefs of Aeroflex's management, as well as assumptions made by and information currently available to its management. Actual results could differ materially from those contemplated by the forward-looking statements as a result of certain factors, including but not limited to, competitive factors and pricing pressures, changes in legal and regulatory requirements, technological change or difficulties, product development risks, commercialization difficulties and general economic conditions. Such statements reflect our current views with respect to the future and are subject to these and other risks, uncertainties and assumptions. Aeroflex does not undertake any obligation to update such forward-looking statements.
