Addendum no. 46892/933 (PDF)
Issue 5

13 January 2011

Introduction

To maintain optimum performance, 3000 Series PXI modules should be used either with the software driver version with which they were supplied, or the latest driver, which you can download from the Aeroflex website.

Aeroflex endeavours to ensure modules remain backwards compatible with earlier driver version releases. This includes 301x and 306x Series, 3020C, 3021C, 3026C, 3030.

However, continual improvement means that from software version **6.2.0** onwards there are some exceptions, which are shown in the table below.

Checking the software compatibility of a PXI module

Use this table to check the compatibility of your PXI module with particular versions of software.

- Modules with a serial number label consisting of black lettering on a **white background** (this includes those shown as 'ALL') are compatible with the driver versions shown in the table.
- Modules with a serial number label consisting of black lettering on a **yellow background** are compatible only with software driver version 6.2.0 and higher (or for 3020A, 3025 only, with version 6.12.0 and higher) as shown in the table.

Please ensure that you install the correct version of software for your module.

Module type	Serial number	Minimum driver version	CD-ROM (46886/028) issue
3010/11	ALL	5.0.0	9
3020	ALL	5.0.0	9
3020A	Up to 302002/288	5.0.0	9
	from 302002/289	6.12.0	23
3020C	ALL	6.2.0	15
3021C	ALL	6.7.0	20
3025	Up to 302024/141	5.0.0	9
	from 302024/142	6.12.0	23
3025C	Up to 302006/094	6.1.0	14
	From 302006/095	6.2.0	15
3026C	ALL	6.8.0	21
3030	ALL	5.0.0	9
3030A	Up to 303003/971	5.0.0	9
	From 303003/972	6.2.0	15
3030C	Up to 303006/055	6.1.0	14
	From 303006/056	6.2.0	15
3035	Up to 303004/392	5.0.0	9
	From 303004/393	6.2.0	15
3035C	Up to 303008/473	6.1.0	14
	From 303008/474	6.2.0	15
3060/65	ALL	5.0.0	9
3065A	ALL	6.12.0	23
